# Postgraduate Diploma in Healthcare

(with a specialisation in Mental Health or Community Health or Addiction)

This Postgraduate Diploma in Healthcare equips learners with the advanced knowledge and practical expertise to address complex health challenges across Aotearoa New Zealand. Delivered online with flexible study options, this qualification allows learners to specialise in mental health, community health, or addiction, while developing critical thinking, ethical reasoning, and evidence-based practice skills. Graduates will be able to design and implement innovative strategies that improve health outcomes for individuals, whānau, and communities.

L8

## What you will study

- Advanced concepts, frameworks, philosophies and informatics for the field of healthcare, critically evaluating their effectiveness for individuals, their whānau/family and communities.
- Ethical reasoning skills for evaluating challenges.
- Innovative strategies and/or interventions to support health of Māori and/or Pasifika communities in Aotearoa New Zealand.
- How to honour the rights and needs of Māori as tangata whenua and the obligations of tangata tiriti to advocate for equitable health and wellbeing.

### Programme Structure

Specialisations: A = Addiction  
C = Community M = Mental Health

Learners will study 120 credit over two semesters, with a focus on the chosen specialisation in Semester 2.
